

Swedtool® Fin Rollers

Aluminum alloy with unique groove cutting properties

Swedtool fin rollers are produced in four different sizes and the corner roller is available with two bend lengths. The roller profiles are made from a special aluminium alloy with unique groove-cutting properties. In this way the company has avoided rollers that comprise loose washers and that in turn can lock the roller, with a detrimental effect. The use of fin rollers produces less splashing from the plastic compared with the equivalent paddle rollers.

Fin Rollers			
Name	Art no.	Width	Diameter
35/12S	50-000121	35 mm	12 mm
70/12S	50-000122	70 mm	12 mm
70/30S	50-000123	70 mm	30 mm
140/22S	50-000125	140 mm	22 mm
11/40-300	50-000131	40 mm	7 mm
11/40-530	50-000132	40 mm	7 mm
