

Swedtool™ Synthetic Rollers

High-quality roller tool for application of polyester

The Swedtool synthetic fibre rollers are intended for the application of polyester. All types are supplied with plastic bearings provided with four holes for easy cleaning with solvents. This design makes it easy to drain the roller head of fluids quickly and efficiently. The synthetic fibre roller is fitted onto the steel bend with a screw and a metal washer. The roller can be screwed out and on again for cleaning.

Pile Lengths:

PY2 = 22 mm

SF = 22 mm

PY2

SF

Name	Art no.	Width	Diameter	Pile lenght
140PY2	50-000171	140mm	35mm	22mm
140PY2R	50-000172	140mm	35mm	22mm
180PY2	50-000173	180mm	35mm	22mm
