

Swedtool® Plastic rollers Ë Long life span with consistent and reliable results.

Radius Roller

The main purpose of the radius roller is to get the glass fiber all the way out in to corners both before and after the vacuum bag is applied. By doing so the risk of getting voids in the corners are dramatically decreased.

- An optimal way to get the glass fiber out in the corners
- No sharp edges prevent tearing of the vacuum bag
- Mounted off centre for better reach

Tacky Tape Roller

The tacky tape roller is used to make sure a bond is made between the tacky tape, the mould and the vacuum bag in order to create an airtight seal to accommodate vacuum.

- High reliability of the seal between mold and vacuum bag
- Evenly distributed pressure
- No sharp edges to prevent tearing of the vacuum bag

The benefits of using Plastic is:

- Low friction
- Smooth feeling for the users
- Easy to clean

Radius Roller			
Name	Width	Diameter	Radius
R.15/60	15 mm	60 mm	7,5
R.25/40	25 mm	40 mm	12,5
R.35/40	35 mm	40 mm	17,5
Tacky Tape Roller			
Name	Width	Diameter	
T.15/40	15 mm	40 mm	
T.25/40	25 mm	40 mm	
T.35/40	35 mm	40 mm
